MAXIMUM MARKS

2 Marks

Customer Problem Statement Template: Create a problem statement to understand your customer's point of view. A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face and build automated workflows people love.

PS ID	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	IT Administrator / Procurement Officer Managing onboarding & hardware supply	Automate and process standard laptop requests efficiently using Flow Designer.	Manual approvals, back-and-forth emails, and redundant data entry slow down procurement.	Approval workflows are fragmented across non-integrated systems without real-time tracking.	Frustrated by administrative bottlenecks and delayed equipment deployment.
PS-2	Newly Onboarded Employee / Hiring Manager Requiring hardware tools	Request and receive an officially configured laptop for Day 1 readiness.	Order status is opaque and fulfillment takes weeks without clear visibility.	Requests rely on manual ticket routing and individual vendor catalog searches.	Anxious and unproductive due to a lack of proper work equipment on starting dates.

PROBLEM STATEMENT STRUCTURAL FRAMEWORK

1. I AM

Describe the customer and key attributes

2. TRYING TO

List the goal they are trying to achieve

3. BUT

Describe the barrier in their way

4. BECAUSE

Describe root causes of the issue

5. MAKES ME FEEL

Describe the emotional impact
