

Brainstorm & Idea Prioritization

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Team ID		Date	01 October 2026
Project / Topic	Automating Standard Laptop Orders	Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Problem Statement: The process of procuring standard laptops for employees often involves manual request submission, approval, inventory verification, procurement activities, and status communication. These manual steps can cause delays, repeated coordination, and limited visibility into request status.

Proposed Solution: Use ServiceNow Flow Designer to automate the standard laptop ordering process. The workflow can validate the request, route approvals, check laptop availability, create procurement tasks when required, update request status, and notify the employee automatically.

Key Objectives

1	Reduce manual effort in standard laptop procurement.
2	Automate approval and procurement activities.
3	Improve visibility of request and order status.
4	Provide timely notifications to employees and IT teams.

Step-2: Brainstorm, Idea Listing and Grouping

#	Brainstorming Idea	Description
1	Automated Laptop Request	Employee submits a standard laptop request through the service catalog.
2	Automatic Approval Routing	Flow sends the request to the appropriate manager/IT approver.
3	Inventory Check	System checks whether the standard laptop is currently available.
4	Automatic Procurement Request	If stock is unavailable, create a procurement task/order automatically.
5	Status Notifications	Notify the employee when the request status changes.
6	Approval Escalation	Send reminders or escalate when an approval remains pending.
7	Order Tracking	Track Requested → Approved → Ordered → Shipped → Delivered.
8	Delivery Confirmation	Update the request after the laptop is delivered.
9	Duplicate Request Detection	Prevent multiple active laptop requests for the same employee.
10	Procurement Dashboard	Display pending, approved, ordered, shipped, and delivered requests.

Idea Grouping

Group	Ideas
Request Management	Automated Laptop Request; Duplicate Request Detection
Approval Automation	Automatic Approval Routing; Approval Escalation
Procurement & Inventory	Inventory Check; Automatic Procurement Request
Communication & Tracking	Status Notifications; Order Tracking; Delivery Confirmation
Monitoring	Procurement Dashboard

Step-3: Idea Prioritization

Priority	Idea	Reason
High	Automated Laptop Request	Starting point of the workflow
High	Automatic Approval Routing	Reduces manual approval coordination
High	Inventory Check	Determines whether procurement is needed
High	Automatic Procurement Request	Automates the core procurement activity
High	Order Tracking	Provides end-to-end visibility
Medium	Status Notifications	Improves communication
Medium	Approval Escalation	Helps reduce approval delays
Medium	Delivery Confirmation	Completes the workflow
Low	Procurement Dashboard	Supports monitoring and reporting
Low	Duplicate Request Detection	Adds an additional control

Proposed Automated Flow: Employee Request → Validation → Approval → Inventory Check → Procurement (if required) → Order Tracking → Delivery → Closure
