PROJECT NAME

Streamlining IT Procurement: Automating Standard Laptop Order...

TEAM ID

SWTID-2026-3408

DATE

01 10 2026

1. CUSTOMER SEGMENT(S)

CS

Who is your customer? Define target roles and personas.

Primary: Enterprise IT Administrators & Procurement Specialists managing onboarding dispatches.

Secondary: Hiring Managers & Newly Onboarded Employees needing Day-1 hardware.

2. JOBS / PROBLEMS

J&P

Which jobs or problems do you address for your customers?

Procure standard pre-configured laptops without manual data reentry.

Secure multi-level budget & management approvals in under 24 hours.

Maintain real-time inventory tracking and clear vendor order dispatches.

3. TRIGGERS

TR

What triggers customers to take action?

New employee onboarding event triggered in HR System (e.g., Workday/ServiceNow).

Hardware refresh cycle notification or unexpected laptop damage report.

4. EMOTIONS

EM

How do they feel before and after facing the problem?

Before: Anxious, frustrated by approval delays, blind to shipping updates.

After: Confident, in control, empowered by Day-1 equipment readiness.

5. AVAILABLE SOLUTIONS

AS

Which alternatives exist? Pros & Cons?

Manual Spreadsheets & Email: Slow, error-prone, zero automated status sync.

Basic Ticketing Systems: Requires human routing at every step; no automated vendor payload.

6. CUSTOMER CONSTRAINTS

CC

What limits choices or prevents taking action?

Strict IT governance and budget cap limits for standard employee tiers.

Reliance on legacy vendor integration endpoints and security protocols.

7. BEHAVIOUR

BE

What actions do customers take to address the issue?

Manually ping managers on Slack/Teams for email signature approvals.

Cross-reference order ticket numbers across vendor web portals manually.

8. CHANNELS

CH

Online & offline touchpoints.

8.1 ONLINE

Self-service Portal, ServiceNow, Teams notifications, Email triggers.

8.2 OFFLINE

IT Asset Locker pickup, Physical handover upon onboarding.

9. PROBLEM ROOT CAUSE

RC

What is the real underlying reason this problem exists?

Fragmented systems without unified automation logic or API-driven workflows.

Lack of standardized catalog options resulting in custom approval loops.

10. YOUR SOLUTION (FLOW DESIGNER AUTOMATED PROCUREMENT ENGINE)

SL

How your solution addresses constraints, root causes, and fits customer behavior:

Automated Flow Designer: Triggers instant multi-tier approval notifications upon request submission.

Standardized Catalog: Restricts selection to pre-approved laptop profiles, eliminating budget ambiguity.

Real-time API Sync: Automatically places vendor orders and streams live tracking into the user dashboard.
