

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Team ID: SWTID-2026-3408

Planning Logic

Sprint – a fixed period or duration in which a team works to complete a set of tasks.

Epic – a big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.

Story – a small task. It is part of an Epic.

Story Point – a number that represents how much effort a story takes to complete (usually in the form of the Fibonacci series).

- 1 – Very easy task
- 2 – Normal task
- 3 – Moderate task
- 5 – Difficult task

Story point scale used: 1, 2, 3, 5

Sprint 1

Epic	User Story	ID	Story Points
Requirement Analysis (Epic 1)	Identify standard laptop models	USN1	2
	Define approval rules and policies	USN2	1
Catalog Setup (Epic 2)	Create standard laptop catalog item	USN3	3
	Configure request form and variables	USN4	3
	Set up roles and approval groups	USN5	3

Total Story Points in Sprint 1 = 2+1+3+3+3 = 12

Sprint 2

Epic	User Story	ID	Story Points
Flow Automation (Epic 3)	Trigger flow on catalog request	USN6	2
	Add approval action	USN7	2
	Create procurement/fulfillment task	USN8	2
	Send notifications to requester	USN9	4
Testing (Epic 4)	End-to-end testing of the flow	USN10	5
Deployment (Epic 5)	Deploy and document the solution	USN11	5

Total Story Points in Sprint 2 = 2+2+2+4+5+5 = 20

Total Story Points

Sprint 1 = 12

Sprint 2 = 20

Velocity = Total Story Points Completed / Number of Sprints

Total Story Points = $12 + 20 = 32$

Number of Sprints = 2

Velocity = $32 / 2 = 16$ (Story Points per Sprint)

Your team's velocity is 16 Story Points per Sprint.
