Project Overview:

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project Description: Automating standard laptop orders in ServiceNow using Flow Designer, so that a catalog request triggers approval and creates the procurement task without manual handling.

Project Version: ____

Testing Period: ____ to ____

Testing Scope:

- Standard laptop catalog item and request form (input validation)
- Flow trigger on catalog request submission
- Approval handling in the flow
- Procurement/fulfillment task creation
- Notifications to the requester

Testing Environment:

URL/Location: ____

Credentials (if required): ____

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Submit a valid standard laptop request	1. Open the Service Catalog 2. Select the standard laptop item 3. Fill all fields and submit	Request is created and the flow is triggered		
TC-002	Submit a request with missing or invalid data	1. Open the laptop request form 2. Leave a mandatory field empty or enter invalid data 3. Submit	Form shows an error and the request is not submitted		
TC-003	Approval of a request	1. Submit a valid request 2. Open the approval as the approver 3. Approve it	Flow continues after approval		
TC-004	Rejection of a request	1. Submit a valid request 2. Open the approval as the approver 3. Reject it	Request is closed and no procurement task is created		
TC-005	Procurement task creation	1. Submit and approve a request 2. Check the task list	Procurement task is created with the correct request details		

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-006	Requester notification	1. Submit and approve a request 2. Check the requester's notifications	Requester receives the expected notification		

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
